

Programmer/Analyst Position

The Programmer/Analyst is a technical position responsible for overall software development needs of the corporation. The primary role of the Programmer/Analyst is to work closely with the Technical Director to assist with product maintenance, product development and client support. The Programmer/Analyst will also help to establish and maintain internal standards and best practices surrounding coding, release management, documentation and other critical business processes.

Key Responsibilities

- Analysis, Design and Development of enhancements to existing products
- Analysis, Design and Development of any new products
- Relational Report Building
- Client Support (when applicable)
- Oracle performance tuning
- Development/Maintenance of System and User Documentation
- Keeping up to date on new technologies and collaborating with team members in determining future direction of our software

Required Skills

- Strong Visual Basic .NET skills (2005 and higher)
- Strong Oracle SQL and PL/SQL Skills (9i and higher)
- Good knowledge of database architecture and best practices
- Good knowledge of the Oil and Gas industry would be a great benefit
- Excellent written and verbal communication skills
- Ability to represent the company in a client-facing capacity

Software/Tools

- Visual Studio .NET (2005 and higher)
- TOAD for Oracle (version 9.6 and up)
- XtraReports
- Visual Source Safe
- Microsoft Office Tools
- Microsoft Visio

Office Hours and Work Environment

- Our office is open 8:00am – 5:00pm, Monday through Friday and closed all Canadian Statutory Holidays
- Task-based approach with an emphasis on meeting goals and targets as opposed to “punching the clock” (potential for flexible hours and some remote work).
- The Programmer/Analyst is a full-time, 40 hour/week position.
- The Programmer/Analyst is expected to be available during office hours

If you are interested in this position please submit a resume with covering email to careers@cogss.com. We cannot guarantee a response to every application but we do keep all submitted resumes on file.
